Redefine The Office

At Grand & Toy, supporting you is our business. With decades of experience serving the Government, we truly understand your needs and your procurement process. Working with us means your team is backed by a passionate group of workplace experts, providing knowledge, insights and customized solutions that maximize efficiency and productivity so your team can work at their full potential. With our furniture solutions you'll be able to work smarter, better, and the way you want.

More Movement. More Productivity.

The human body is designed to move, but let's face it – we spend most of the day sitting down. Research shows that office workers are tired of this sedentary lifestyle and appreciate employers who invest in their wellbeing. By incorporating ergonomic and collaborative workspaces in the office, it's a win-win for all – employees get the support their bodies need, and employers reap the benefits of improved productivity, efficiency, and more.

Attract and Retain Top Talent

In the competitive world of hiring (and retaining) top talent, your investment in workspace solutions will go a long way. Providing employees with an ergonomic environment shows that you take their health and wellbeing seriously, and this will not only help you attract, but also retain the best workers.

Improve Productivity and Efficiency

The workspace plays a critical role in employee happiness, creativity and overall morale. By designing a space to allow for good posture, less exertion, fewer motions and better heights and reaches, the workstation becomes more efficient and workers become more productive.

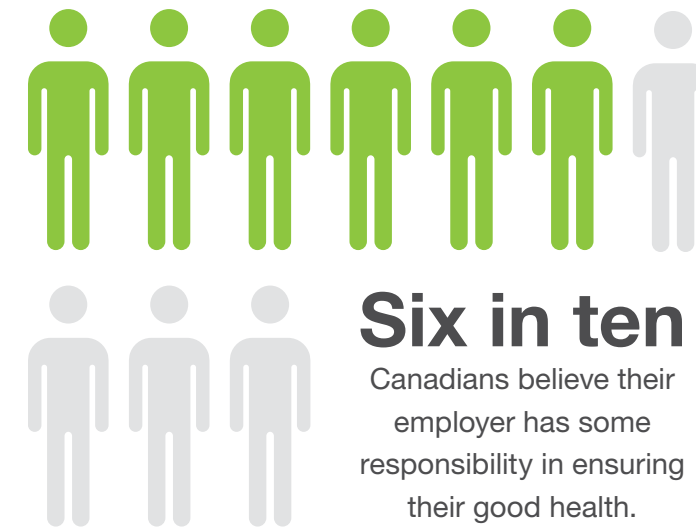

Invest in Long-Term Health and Wellbeing

Sedentary lifestyles come with long-term health problems including high blood pressure, cholesterol and obesity, which ultimately results in higher absenteeism and lower productivity rates in the workplace. Invest in ergonomic solutions that keep your workforce healthy and moving – because it's better business in the long run.

Facilitate Team and Company-Wide Collaboration

Many of today's workplaces focus on individuals over groups and offices are structured with this approach in mind. Investing in collaborative workspaces means giving your team the opportunity to work with each other and strive towards common goals and objectives. It fosters friendships, idea sharing and overall improvements in employee engagement.

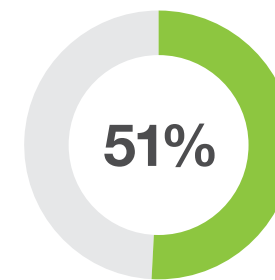

Sit-stand workstations with adjustable height settings reduce sitting time by an average of

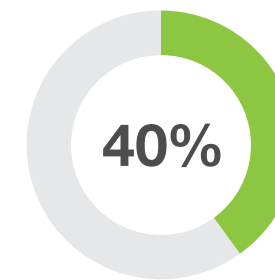

84-116
minutes a day

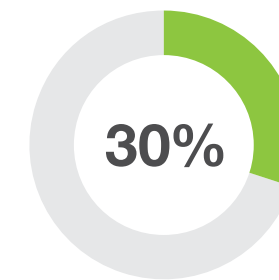

Percentage of employers who experienced the following benefits from their **wellness programs**

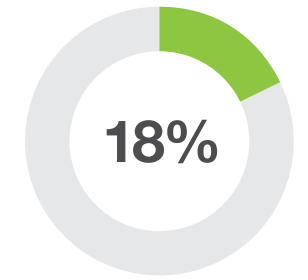

improved employee morale

reduced absenteeism

improved productivity

fewer disability claims

For every **dollar** spent on wellness programs

medical costs fall by about

\$3.27

and absenteeism costs fall by about

\$2.73

77%

of employees think that **employee wellness programs** positively impact the company culture.

24%

of employers report sedentary lifestyle as their **number one** workplace concern.

We Get Government

Solutions for Every Need

With complete furniture solutions we're here to support you and your team, so you can produce the best work every time. Specializing in everything from simple desk solutions to complex, multi-location projects, our comprehensive planning ensures you maximize the potential of your space.

Dedicated Team of Experts

By combining industry knowledge with best practices, our dedicated team of experts offer insights and guidance, while identifying your current and future workplace needs. With Grand & Toy, you have a team that supports you along the way and for years to come.

Tools for Efficiency

Our online tools and services simplify the buying process and allow your team to be more efficient while reducing costs. Through tools like online quoting, spend reporting, fast online ordering, and e-invoicing you and your team will have more time to focus on the things that matter most.

Brand History

For over 130 years Grand & Toy has proudly served Canadian customers and has earned a legacy built on trust and experience that organizations big and small have come to depend on. We work directly with top manufacturers and distributors to make sure you get the best prices, wide product selections, and top-notch service.

National Distribution Network

With the support of a state-of-the-art national distribution and supply chain infrastructure, we deliver thousands of products from coast to coast through our direct sales force and best in class e-Commerce platform.

Interconnecting Panels and Freestanding Systems

E60PQ-140003/045/PQ

Category 1A and 1B

Interconnecting Panels and Freestanding Systems

Create a customized workspace with all the functionality, flexibility and style you desire. With a collection of multiple work surfaces, storage and space-division solutions that can be pieced together in multiple orientations, you can create anything from traditional panel-based workstations and private offices to benching applications and meeting areas for your collaborating teams.

Sit. Stand. Move.

Height adjustable tables help foster movement in people's lives so they can sit, stand and move with ease and comfort, without interrupting focus. Not only do they achieve better health and wellness for your employees, but also translate to less missed work, better engagement and more productivity for your office.

Foster Creativity and Collaboration

Transform sedentary office environments into active spaces that promote productivity, creativity and collaboration. Quickly and quietly change table positions to energize meetings and keep participants active and engaged.

It's in the Details

Design your office exactly the way you want. Available in a wide range of sizes, finishes and orientations, these workstations can be customized to suit the look and feel of any space.

Anatomy of an Ergonomic Chair

Product Features

1. Tilt Tension Control

Recline rate adapts to your weight. The tilt tension control helps regulate the rate and ease that the chair reclines to offer a more comfortable seated position and balanced weight distribution, easing pressure on the body.

2. Tilt Lock

Locks out the tilt tension function once the desired position is achieved in order to keep the chair in a secure, upright position.

3. Back Angle Adjustment

Sets back angle in reclined position for personalized comfort. An adjustable backrest helps to prevent slumping and alleviates stress on the spine and pelvis by aligning the curve in the chair to the natural curve in your spine.

4. Synchro-Tilt

Back reclines in a preset ratio to seat to allow you to recline while keeping the seat cushion relatively level to the floor. Chairs with synchro-tilt offer improved circulation and redistribution of pressure points during the workday.

5. Seat Height Adjustment

Sets seat height to desired position relative to floor. The optimal seat height should allow you to place your feet flat on the floor.

6. Back Height Adjustment

Raise or lower to support the lumbar (lower back) region. The lumbar support should fit right in the natural curve of your spine, typically at the small of your back directly above your belt line, to offer maximum comfort and alleviate stress on the spine and pelvis.

7. Seat Depth Adjustment

Adjusts seat depth relative to back. Proper seat depth should leave between 2-4 inches between the edge of the seat and the back of your knees to avoid unnecessary pressure.

8. Arm Height Adjustment

Adjusts arm up or down for proper ergonomic positioning while seated. The proper arm height reduces the amount of stress on your neck and shoulders acquired from sitting for long periods of time.

9. Arm Angle Adjustment

Arm pads swivel in or out for proper ergonomic positioning. This feature comes in handy when you're trying to customize your chair to fit your specific body type or if you want good forearm support while typing at your keyboard.
